

PART 2

PRODUCTS AND SERVICES BOUGHT BY MAJOR MILITARY PURCHASING OFFICES

This part deals with the major purchasing offices; it consists of two sections.

Pages 25 to 54 list the major military purchasing offices of the Army, Navy, Air Force, and Defense Logistics Agency (DLA). The accompanying description summarizes the procurement responsibilities of each of these **offices**. This list will help you determine which major purchasing offices offer sales opportunities for your firm. The telephone numbers are those of the small business specialists. The second section of this part (pages 55 to 69) lists the products and services purchased by the major military purchasing **offices**. It will be easier to locate sales opportunities for specific items from this list. These items are listed in the numerical sequence of their FSC codes. Once you have located the product or service in which you are interested, note the alphanumeric designators that appear after it. These designators refer back to the major purchasing offices. For example, look at the classification "FSC 1550, Drones" in the listings of products and services. After this classification appear "A-8, N-5, N-1 1 and **AF-3**." By turning to the list of major purchasing offices and locating these designators, you will find that drones are purchased by Redstone Arsenal, AL, by the Naval Air Systems Command, Arlington, VA, Naval Regional Contracting Center, Long Beach, CA, and by the Air Logistics Center at McClellan AFB, CA.

For each product or service, the FSC list refers to the major buying offices. Other offices may also buy the listed items, but less frequently. You may form your own opinion on the basis of the brief descriptions furnished for each of the major purchasing **offices** listed. If your product or service can be acquired under the simplified small purchase procedures, you should ensure that those potential buyers geographically closest to you are aware of your desire to supply their needs. A geographical listing of all military purchasing offices is contained in the booklet entitled Small Business Specialists.

Suppose, for example, that your product is used by data processing groups. Table 2 (on page 14) sends you to FSC group 70. The listing suggests "General Purchase" for all the subcodes of group 70. This means that contracts for ADP equipment and support are awarded not only by major buying offices but by others, too. Your marketing effort should, therefore, focus not only on the major offices, but on all offices conveniently located to you; you can find a geographic listing of purchase offices in Small Business Specialists.

Services tend to be acquired locally. You should look in the listing arranged by FSC codes, showing the major buying offices that make significant amounts of awards for each category of service. But, for most services, you should arrange to get on the appropriate SMLS of the DoD buying offices in your region.

Remember, you are not selling your product! You are letting the Government's buyer know about you. The Government will not usually be able to respond immediately. It may be as much as a year after you express your interest before you routinely receive solicitations.

AF-6 Aerospace Guidance and Metrology Center
Directorate of Contracting (PK-2)
813 Irving-wick Dr, West
Newark AFB, OH 43057-0027

(614) 522-7289

Principal interests: AGMC is the single point of maintenance for Air Force inertial Guidance and Navigation Systems (IGNS). AGMC is also the single point of management for the Air Force Metrology and Calibration (AFMETCAL) Program. Most components and services needed to support the IGNS maintenance effort are acquired through Item Managers located at Air Logistics Centers; therefore, AGMC does not directly buy significant quantities of the IGNS components and services. But, pursuant to the AFMETCAL Program, AFGMC does directly buy metrology equipment for the 176 Precision Measurement Equipment Laboratories (PM EL) located worldwide at Air Force installations. The Directorate of Contracting at AGMC also acquires supplies, services, and construction projects needed to support the facilities and people located at Newark AFB.

Most of the metrology equipment bought by AGMC for the PMELs is classified as Instruments and Laboratory Equipment, Federal Supply Group (FSG) 66. The supplies bought by AGMC to support Newark AFB itself are varied and none of the FSG numbers predominate. The services that AGMC acquires for Newark AFB are mostly FSG J, Maintenance, Repair and Rebuilding of Equipment; specifically, repair of equipment other than IGNS. Virtually all of the construction projects acquired to support Newark AFB are either FSG Y, Construction of Structures and Facilities; or FSG Z Maintenance, Repair or Alteration of Real Property. AGMC issues an Acquisition Plan annually to communicate to industry its major long-term equipment requirements. The plan is available free upon request and all potential sources are encouraged to request the plan from the above point of contact.

The operational contracting division contracts for supplies, equipment, and work necessary for the operation and maintenance of Newark AFB.

Evaluates using command requirements against available technology and potential costs and recommends necessary revisions. R&D contracts are also initiated by the Geophysics Directorate of the Phillips Laboratory (PL) in the environmental, physical and engineering sciences. The geophysics Directorate performs research and exploratory and advanced development in geophysics that is essential to the enhancement of Air Force operational capabilities. The work pursued may be categorized generally as falling within the following functional areas: Space Physics, Ionospheric Physics, Terrestrial Science, Upper Atmospheric and Stratospheric Operations, **Optical/IR** Backgrounds and Targets, Weather Specification and Prediction. Close liaison is maintained with Air Force operational elements, system development activities, and other Air Force laboratories, to identify research and technology needs and to accelerate the integration of scientific advances into Air Force technology. Geophysics Directorate carries out its assigned R&D mission responsibilities with in-house as well as contractual support.

While there are not Air Force aircraft assigned to Hanscom AFB, the operational contracting directorate does contract for all other work necessary for the operation and maintenance of the base.
